EXPERIENCE

Digital Technology Leadership Program Associate

United Technologies

Jun 2018 - Current

Farmington, CT

- A selective and intensive digital program with exposure to all UTC business units
- Supporting functions through cybersecurity, data science, enterprise business systems, infrastructure, product management, software development, and user experience design

Project Manager - ERP Finance

Collins Aerospace

March 2019 - Current

Charlotte, NC

- Collaborated with 32 users to test 192 scenarios and traiged defects to ensure a successful go-live
- Automated the creation of a daily status report using Python, saving eight hours per month
- Created SAP configuration transports to resolve production defects
- Developed a project plan to automatically collect garnishments

Product Manager - Customer Portal Web-App

Otis Elevator

Jun 2018 - Feb 2019

Farmington, CT

- Prioritized features to be developed to address user pain points
- Managed the integration, testing, and deployment of live chat software
- QA tested and built test cases in Azure DevOps to establish confidence in our product
- Cooperated with multiple countries and launched our web-app globally

Software Application Intern

UTC Aerospace Systems

May 2017 - Aug 2017

Danbury, CT

- Styled the front end of an internal application with CSS, providing a meaningful user experience
- Created batch scripts to deploy new updates to internal users
- Built a java program to automatically sync up two databases

PROJECTS

CS:GO Nades

- Developed a full stack, educational web-app to enable the CS:GO gaming community to share insights
- Built with MongoDB, Express.js, React, Node.js, and Bootstrap for a mobile friendly and responsive UI

Senior Dev Project with Rapids Cemetery

- Collaborated with a team of 5 to design and develop a new modern website for a local cemetery, winning first place out of 4 other teams. I focused on the front end of this project
- Built with PHP and SQL while utilizing Bootstrap and Google Maps API
